

FD-IoT Smart Maintenance

Providing Optimal IoT-Based Visualization Services for Customers Concerned About the Maintenance Management of High-Frequency Induction Heating Equipment

Customer Benefits of Implementation

Self-Check Anytime, Anywhere

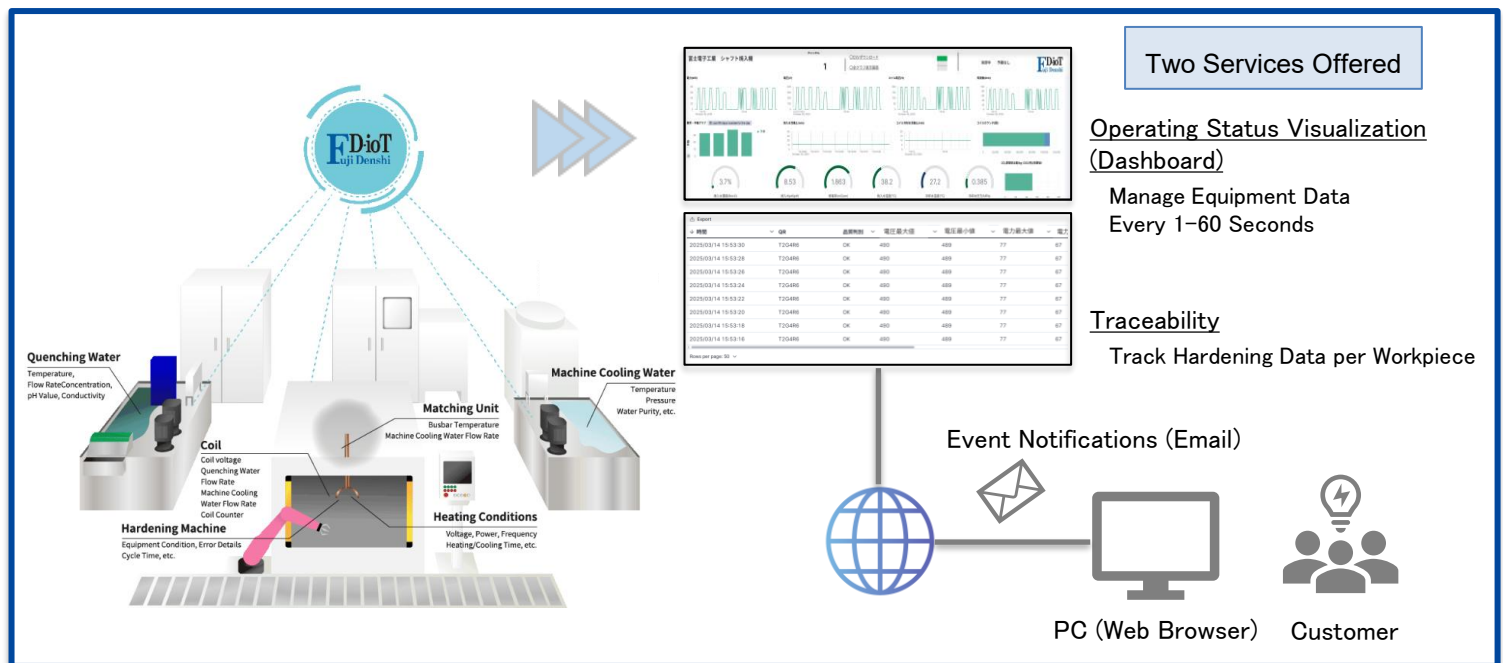

- Monitor Equipment Within Your Company's Environment
- Access Easily via Web Browser
- Visualize 2 Months of Data
- Save Historical Data as CSV

Equipment Health Check

- Monthly Report Submission
 - Analysis by FUJI-DENSHI
 - Insights & Improvements
- Early Detection of Failure Signs

Remote Repair Support

- Smart Response to Issues
 - Data-Based Assessment
 - PLC Update & Check
- Contributing to SDGs & Workstyle Reform

Retrofittable IoT System for Existing Equipment

- Simple Setup with Sensor/IoT Device Installation and Registration of Required Information Only
- Secure Communication Without Connecting to Customer's Internal Network
- Centralized Management of Multiple Sites (Incl. Overseas)
- A Continuously Evolving System with New Features Added Through Software Updates

FD-IoT, On-Premise Edition

For customers concerned about sending operating data outside the company — we support your factory by visualizing equipment status without the cloud.

Under development

Customer Benefits of Implementation

Self-Check, Entirely In-House

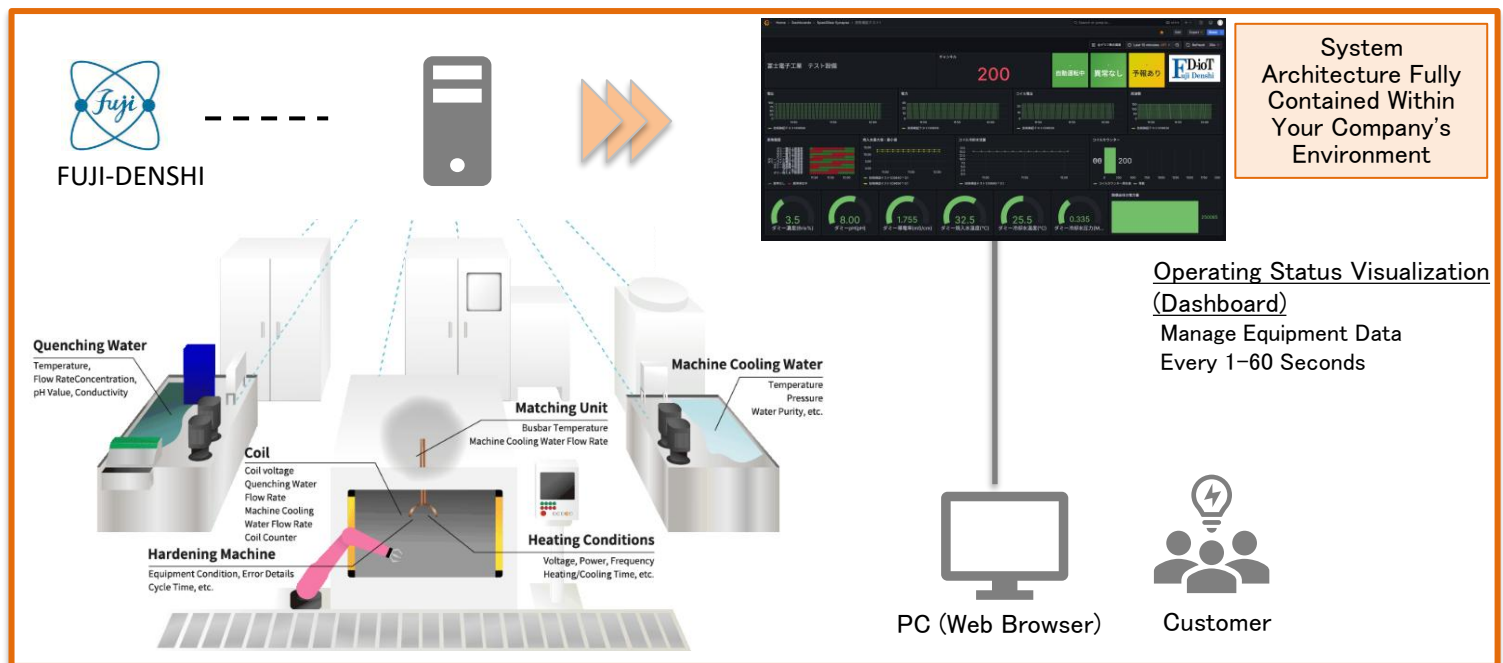

- Monitor Equipment Within Your Company's Environment
- View Easily via Web Browser
- Visualize 1 Month of Data
- Save Historical Data as CSV and Utilize it
- Store Data Within Your Company's Environment

Equipment Health Check

- Monthly Report Submission
 - Analysis by FUJI-DENSHI
 - Insights & Improvements
 - Early Detection of Failure Signs
- ※FUJI-DENSHI retrieves the data needed to create the report via VPN.

Remote Repair Support

- Smart Response to Issues
 - Data-Based Assessment
 - PLC Update & Check
- Contributing to SDGs & Workstyle Reform

Retrofittable On-Premise System for Existing Equipment
